TO: Assistant Director Don Alway, Weapons of Mass Destruction Directorate, FBI

Assistant Director Alway,

I have been working with scientists and medical professionals since the beginning of the Pandemic to understand the biological mechanisms of SARS2, including mitigation strategies and treatment options. I am aware that the current mainstream narrative is that the vaccines are safe and effective - there is a growing group of world-renowned subject matter experts that disagree with the "science" that is being used by the CDC, NIH, FDA, NHS, and WHO to justify the continued use of an untested hazardous biological agent on U.S. Citizens and the world.

The Covid vaccines are not a viable and safe method to be used to contain and end this pandemic. Covid Vaccines rely on the use of the SARS2 Spike Protein. The Spike Protein is highly toxic and lethal on its own (without the viral component), it poses a biological and environmental threat that has the potential to lead to a much higher death toll than we have already experienced during this pandemic.

The Spike Protein has numerous "fingerprints" pointing to a manufactured biological weapon, it can be aerosolized and can easily be deployed as a chemical weapon with devastating short term and long term impacts.

SARS2 was rapidly labeled a respiratory disease. However, my research has revealed that the primary destructive mechanism of SARS2 and the S-Protein is an envenomation. I have revealed and alerted the scientists and medical professionals that I have been collaborating with, and I aim to publish my findings within the next few weeks.

The level of scientific censorship and medical propaganda that has been used by government health agencies and pharmaceutical companies before and during this pandemic has not been seen since the Nazis and WW2. The commercial interests in the pandemic and the covid vaccines have been prioritized over the lives, safety, and dignity of U.S. Citizens.

2,403 people died at Pearl Harbor 2,996 people died during the September 11 attacks, we passed the 600,000 mark of the U.S. death toll this week, which makes this the largest mass killing in U.S. history by an incomparable number. The American people and the world deserve a thorough investigation and an end to this man-made tragedy.

I would like to offer my assistance to you and the Nation to deal with this significant threat. If my assessment is correct we are not at the end of the pandemic, we have just passed stage one of a complex attack.

There are very few professionals in the world who work in Threat Assessment and Threat Management who have an adequate skill set to understand and unpack the complexity of this worldwide biological attack. Proficiency is needed in diverse sciences to understand the chemistry and biological mechanisms that are involved in this Pandemic. I am ready, willing, and able to assist.

What role are you and your team playing in the Wuhan Lab Leak investigation, and or the assessment of SARS2 as a biological weapon?

I am here to help in any way I can. As always I am honored to serve this great Nation - to ensure life, liberty, and the pursuit of happiness for all prevails.

Sincerely,

Dr. Tau Braun

U.S. National Counterterrorism & EMS Advisor and Trainer
Executive Director, Violence Prevention Agency | VPA
